

CONTINUING PROFESSIONAL DEVELOPMENT

This is to certify that

Susan Wilsher

Completed the Bio-Oil module

Management of Patients with Scarring in Primary Care covering:

The physiology of scars

Psychological impact on patients

Management of patients with scarring

The aims and objectives of the training were:

- To update knowledge on scar formation, types of scars and current evidence-based treatment and self-care options to reduce scarring
- To increase awareness and clinical confidence on when to discuss scar management with patients and offer advice for self-care
- To improve understanding and empathy of the physical, psychological and social impact of scarring

Natalia Wieclaw
